make the following reg changes:

```
HKLMSYSTEMSetup
AuditInProgress = 0
cmdLine = "setup -newsetup"
FactoryPreInstallInProgress = 0
MiniSetupInProgress = 0
SetupType = 0 //this one is important!!!
SystemSetupInProgress = 0
```

```
HKLMSOFTWAREMicrosoftFactory
delete this entire key
```

and on the HDD:
c:\sysprep (or wherever you extracted it to)... delete it.
